

WE MAKE THE STUFF
THAT MAKES THE
COOL STUFF WORK.

WE MAY NOT MAKE THE MOST EXCITING PRODUCTS.
BUT TRY TO MAKE YOURS WORK WITHOUT THEM.

We've been serving customers since 1991, when we began building wire harness assemblies for Blue Bird®, one of the best-known names in school and transit buses. Today, from our 60,000-square-foot, state-of-the-art facility in Fort Valley, GA, we make the highest quality wire harnesses, battery cable and custom assemblies. Not the sexiest stuff to chat about at a dinner party. That's usually reserved for the products made by our customers. In fact, we're used to living vicariously through our customers. We're a certified supplier for some of the biggest names in:

- ◆ Agriculture
- ◆ Automotive
- ◆ Commercial Products
- ◆ General Industrial
- ◆ HVAC (Climate Solutions)
- ◆ Material Handling
- ◆ Medical Equipment
- ◆ Specialty Vehicles
- ◆ Telecommunications
- ◆ Many Others

They make the really interesting stuff. We just make sure that whenever someone turns a key, pushes a button or flips a switch, those products come to life. Just like they're supposed to.

YOU MAKE IT. WE'LL MAKE IT WORK.

Send us your specs or prototype drawings, no matter how challenging or preliminary they are. We'll work with you to get everything set up right from the start. Effectively, efficiently and economically. The promises you make to your customers come with high expectations. So we hold ourselves to an even higher standard.

FLAWLESS PRODUCTS ARE OUR PASSION We maintain registration to ISO 9001 international quality standards, and all our products meet UL, CSA and RoHS requirements. We're registered with ASR, a leading management systems registrars. We're committed to reducing customers' costs by consistently minimizing waste and increasing productivity.

RELENTLESS TESTING We're here to make your products work. Each of our products undergoes a first-piece inspection along with 100% electrical testing. If it's not perfect, it won't go out the door.

BORN IN THE USA To sustain consistent quality, our manufacturing is US-based. Low-cost Asian manufacturing is also available, supported by US-based quoting, design, engineering and support.

ALL UNDER ONE BIG ROOF We feature in-house engineering, reverse engineering, test capabilities, design and dedicated account service. Let us customize something for you.

SUPER-FAST We can provide same-day quotes and 24-hour turnaround. When time matters, we understand.

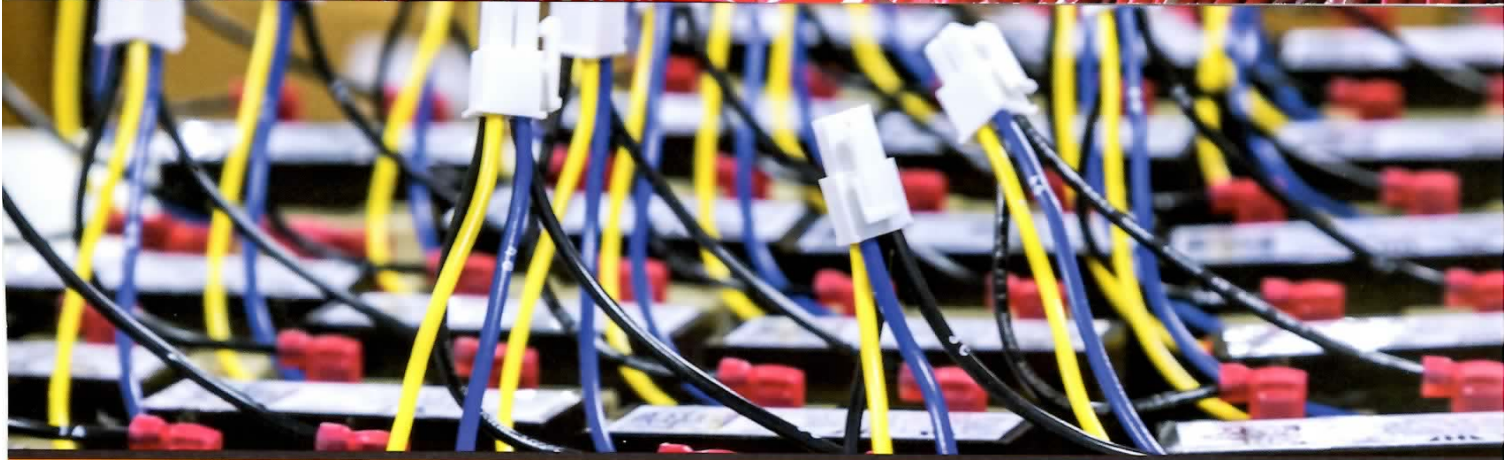

CUSTOM WIRE HARNESSES

They might not be pretty, but wire harnesses sure are important. From your design we'll produce a solution in concept, prototype or mass production form. We know how important your product is, so we'll always strive to exceed your expectations.

BATTERY & POWER CABLES

It's no secret your product can't work without them. So you can be sure your battery and power cables will be custom-made to your exact specifications, and our exacting standards. And when you're dealing in large volumes, our automated processes can significantly cut cost and speed up delivery.

& CABLE ASSEMBLIES

The final product has your logo on it, so it better work. Every time. From simple point-to-point to more complex multi-terminal assemblies, you can count on us to deliver custom cable prototyping and flawless manufacturing.
